DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 12 and 13, drawn to a method of protecting parts of a mushroom growing tray, classified in class 47, subclass 66.7.
- II. Claims 14-17 and 19, drawn to tray liner with series of reliefs, classified in class 47, subclass 1.1.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product. The process as claimed merely requires a structural support which could encompass a multitude of structures such as a paper clip, an I-beam structure, a stick, etc. Also, the process does not require the tray liner to have notches. The tray liner for the process could even be a paper or plastic bag.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Karen Russo on 5 January 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
